# Contents

**Contributors** i

**Reviewers** iii

**Foreword** 1
*Tom J. Cade*

**Preface**
Applied raptor ecology in a quantitative age: how to use this book 5
*Christopher J.W. McClure*

1 Priorities for Gyrfalcon research: food, weather, and phenology in a changing climate 11
*Alastair Franke*

2 Terminology 33
*Alastair Franke, Carol McIntyre, and Karen Steenhof*

3 Gyrfalcon and ptarmigan predator-prey relationship 43
*Ólafur K. Nielsen and Tom J. Cade*

4 Systematic data management 75
*Cameron J. Nordell and Alastair Franke*

5 Quantifying diet 91
*Bryce W. Robinson*

6 Assessing the effects of environmental variables on nestling growth using non-linear mixed effect models 113
*Erik Hedlin and Alastair Franke*

7 An introduction to survival analysis using generalized linear mixed models 127
*Erik Hedlin and Alastair Franke*

8 Monitoring prey populations with distance sampling surveys 147
*Kevin A. Hawkshaw, Ólafur K. Nielsen, and Alastair Franke*

9 Estimating trends in ptarmigan numbers 171
*Jenný Brynjarsdóttir and Ólafur K. Nielsen*

10 Accounting for imperfect detection in estimates of yearly site occupancy 183
*Erik Hedlin and Alastair Franke*

11 Home range estimation: examples of estimator effects 207
*Mathieu Tétreault and Alastair Franke*

12 Body condition and reproductive phenology 243
*Vincent Lamarre and Alastair Franke*

**Appendix 1**
A photographic and morphometric guide to aging Gyrfalcon nestlings 265
*David L. Anderson, Kurt K. Burnham, Ólafur K. Nielsen, and Bryce W. Robinson*

**Appendix 2**
Guidelines for conducting a camera study of nesting raptors 283
*Bryce W. Robinson and Mark Prostor*
